**Recommendations:**

Label your package with the A5 form of this declaration..

Include MSDS sheets with samples containing any hazardous materials, if the samples are safe mention: absolutely safe, non-toxic, non-hazardous, non-flammable.

Describe each sample vial/bottle with approximately net weight and content in plain English. Avoid using chemical names.

For example: 3 bottles, each approximately 10 gram fly-ash (ash from pulverized fuel burned in power station) 4 bottles, each approx. 0.2 gram zeolite, 2 bottles, each approx. 0.2 gram copper on zeolite (zeolites are alumino-silicates)
